REFINED Japan Earthquake Fund

On March 11, 2011 Japan was hit with one of the largest earthquakes on record reaching a magnitude of 9.0 that triggered a deadly tsunami that slammed into the nation's east coast leaving more than 25,000 people dead or missing and caused excessive damage to the Fukushima Dai-ichi nuclear power plant that has sent hundreds of thousands of people fleeing the area in fear of radiation poisoning.

The direct damage spread more than 500 kms wide in 12 prefectures including Tokyo, and hundreds of major cities, counties, ports, villages were destroyed including highways, roads and infrastructure affecting the water, food, gas and electricity that is still not working in many parts of Japan. The Tohoku-Chihou-Taiheiyo-Oki Earthquake as it is called has created one of the most costly natural disasters in our history and we want to show that the world is there to support Japan and its people.

SUPPORT THOSE IN NEED

Refined Resort Residences and its team is committed to stay in Japan and help the people they love and the country they call home and have therefore developed this site to reach out to our friends, family and clients to raise funds to help the domestic charities and municipalities here in Japan serving the people suffering the most in Japan. Your donations will make a significant difference to the people coping with everyday life in Japan during this aftermath and help restore dignity to its people.
